FIRE INSURANCE NOTICES, &c. ALEXANDRIA AGENCY

HEAD OFFICE FOR THE UNITED STATES,

No. 37 South Third Street, Philadelphia. Paid up Capital and Surplus 2,194,111 02 SECURITY TO POLICY HOLDERS.

THIS old and responsible Company insures against loss or damage by Fire, almost every description of property, and offers to Merchants and others desiring insurance, the security of an actual Capital of \$6,298,800, for the whole of which, Feb and for any liabilities beyond, the Shareholders are INDIVIDUALLY RESPONSIBLE, even to the extent of their entire fortunes. The Shareholders number Iron, and Iodide Sulphur, prepared, and for sale about one thousand, and us a large portion of these are persons of great wealth, the most ample | Mh. 62, cor. of Fairfax and Prince-sts. provisions exist for meeting every possible claim

> STATES. In appointing an Agent for the United States,

the Company has empowered him "to appear to and accept any action or legal proceedings instituted against or by said Company, in the same manner as if the Company were a Corporation or Company established by the laws of the United States, or any of the several States." PROVISION FOR PAYMENT OF LOSSES IN

THE UNITED STATES.

A SPECIAL PERMANENT FOND HAS BEEN PLACED AT THE DISPOSAL OF THE AGENT AT PHILADELPHIA, Jun TO ENABLE HIM TO ADJUST AND PROMPTLY PAY ALL Losses, WITHOUT REFERENCE TO LONDON. LIBERAL TO THE INSURED.

The uniform course of the Company has always been a liberal one towards Policy Holders. No just elaim has ever been disputed, and prompt payment of losses is a standing rule. During the past year, losses exceeding \$525,000 were paid. Losses paid as soon as the amount is ascertained. ANNUAL INCOME.

The Income of the Company is now about \$1,

The Rate of Premium will be moderate, and in Apothecary, 94 King street, all cases will be based upon the character of the SIME'S BALSAMIC PECTORAL.—This well owner or occupant, and the merits of the risk. The conditions of Insurance are framed with the greatest liberality. JAMES T. CLOSE, Agent.

gar Office in Exchange Block, on King street. SOUTHERN PROTECTION INSURANCE COMPANY, ALEXANDRIA, VIRGINIA.

CAPITAL OVER 350,000 DOLLARS, AND CONSTANTLY INCREASING. The Charter of this Company offers more favorable advantages to the farmer and others, than any Company chartered in the State, by insuring with or without a premium note. If the applicant prefer, he can pay the full amount of the premium in each, or by effecting a cash insurance for two years, the insured saves one-eighth of the amount he would otherwise have to pay; or by becoming a member, and giving a small premium note, the in sured saves nearly one-half of the amount charged by Stock Companies, when insuring from year to This is the advantage resul

CASH AND MUTUAL PRINCIPLE. This Company commenced issuing Policies against loss or damage by fire, on the 13th day of HELMBOLD'S FLUID EXTRACT OF BU- March, 1854, since which time over seven thousand seven hundred persons have insured and become members of the Company, and over seventy thousand dollars have been paid for losses. Having increased our business during the past year, we feel grateful for the liberal patronage bestowed upon the Company thus far, and for its flattering prospects of future usefulness. The Directors hope and believe, that, by prudence, caution, and a rigid system of economy, they will establish for this Company a reputation for cheapness and safety not surpassed by any Company in the U. States. All differences in settlement of losses, may be determined by three disinterested arbitrators of the County where such loss happened, to be mutually chosen by the insured and the Company.

SOLAR PHENOMENON. Astronomers and scientific men have been much interested in a phenomenon observed on the 1st of September last, upon the surface of the sun. The Royal Astronomical Society of London have published an account of it, given by two observers at different points of view. A Mr. Carrington, who has for some years past paid particular attention to the study of spots upon the sun, was engaged at his customary observation 2 3 4 5 6 7 8 on Thursday forenoon, September 1st, when 9 10 11 12 13 14 15 he observed two patches of intensely bright 115 17 18 19 20 21 22 and white light to break out, in a position which he indicates upon a diagram. His first impression was that by some chance his apparatus for obscuring the light had 14 15 16 17 18 19 20 been disturbed, for the brilliancy, even when

that of direct sunlight; but he says: "By at once interrupting the current observation, and causing the image to move, I saw I was an unprepared witness of a very different affair. I therefore noted down the I time by the chronometer, and seeing the outburst to be very rapidly on the increase, being somewhat flurried by the surprise, I hastily ran to call some one to witness the exhibition with me, and on returning within 60 seconds, was mortified to find that it was already much changed and enfeebled. 6 7 8 9 10 11 12 Very shortly afterwards the last trace was 13 14 15 16 17 18 19 gone, and although I maintained a strict watch for nearly an hour, no recurrence took place.

seen through a screen, was fully equal to

"At the last traces, the patches had travel-10 11 12 13 14 15 16 ed considerably from their first position, and 17 18 19 20 21 22 23 vanished as two rapidly fading dots of white light. The instant of the first outbreak was not 15 seconds different from 11h. 18m. Greenwich mean time, and 11h. 23m. was January Term. Turner Dixon, P. J.; John taken for the time of disappearance. In Summers, H. W. Febrey, Henry L. Smapson, and this lapse of five minutes, the two patches of this lapse of five minutes, the two patches of light traversed a space of about 35,000 miles. It was impossible, on first witnessing an appearance so similar to a sudden conflagraion, not to expect a considerable result in the way of alteration of the details of the group in which it occurred; and I was certainly surprised, on referring to the sketch which I had carefully and satisfactorily (and I may add fortunately,) finished before the occurrence, at finding myself unable to recognize E. B. Powell, Robert G. Violett, and Robert any change whatever as having taken place. The impression left upon me is, that the *Juny Term,-Turner Dixon, Richard M Smith, phenomenon took place at an elevation considerably above the general surface of Thomas Smith, Charles P. Shaw, and Wesley the sun, and accordingly, altogether above July Term .- Turner Dixon, Josiah H. Davis, and over the great group in which it was

"Both in figure and position the patches August Term .- Turner Dixon, Jas A. English, of light seemed entirely independent of the Henry L. Simpson, J. J. Wheat, and E. B. Powell. conflagration of the great spot, and of its September Term. Turner Dixon, Jos. C. Moore, parts, whether nucleus or umbra."

A Mr. Hodgson also chanced to be obving the sun at his house at Highgate, and saw, what he styles a very brilliant star of light, much brighter than the sun's surface, most dazzling to the protected eye suddenly appear, last about five minutes and suddenly disappear, Mr. Bond, the American astronomer, thinks that the brilliant auroral displays of September 1st and 2d, witnessed in America, in Europe, in Australia, in South America, and probably in the circumpolar regions of both hemispheres, accompanied as usual by a magnetic storm, had some connection with the condition of the sun's surface, as observed by Messrs. Carrington and Hodgson. Such connection has been for several years suspected, and the present evidence is cumulative to the point.

Mr. Bond says: "It shows, too, the fearful intensity to which the burning or chemical action taking place on the sun's surface, is at times carried, The brightest artificial light known, is said to become a dark object when presented with the surface of the sun as a back ground .-What adequate conception can be formed of the intense light of these spots, which acand Henry Shackelford, Directors on the part of cording to the description of Mr. Hodgson, sparkled like stars of dazzling brillianev upon its disc, or, as related by Mr. Carrington, appeared 'intensely bright and white' in contact with ordinary sunlight."-Hartford
